***ACCELERATING INFRASTRUCTURE PRODUCTIVITY***

ORGANISED BY :

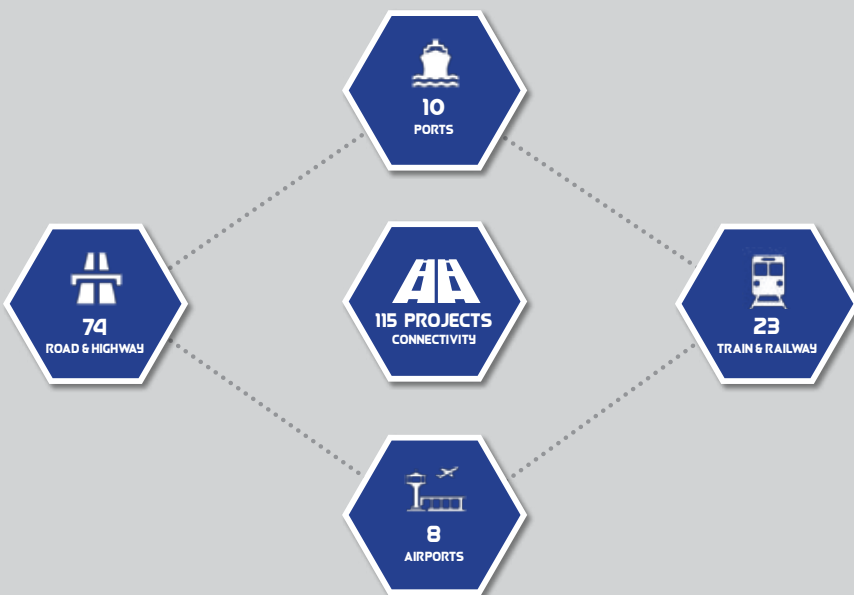

SUPPORTED BY :

# Accelerating Infrastructure Productivity

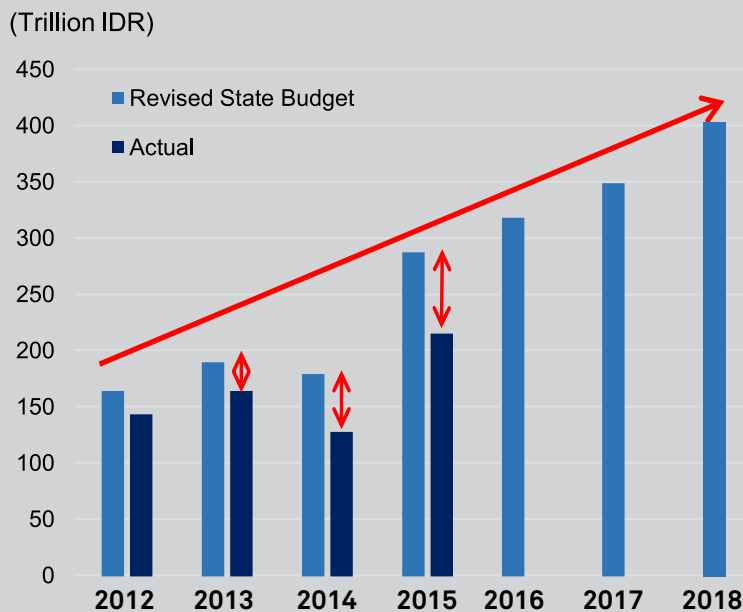

The country's present National Medium - Term Development Plan 2015 – 2019 (RPJMN 2015 – 2019) highlights infrastructure development for connectivity and accessibility, enhancing the maritime sector, integration of remote and frontier regions, shifting transport from road to rail and shipping, and addressing solutions

for urban mobility. In 2018, the government of Indonesia has cut down 14 national strategic projects to accelerate the productivity on the most viable infrastructure projects namely, Trans Sumatera Railroad Network, Makassar New Port, Kertajati International Airport, and Trans Java Highway Road.

# Enhancing Business, Empowering Nation

## INDOCONSTECH

ACCELERATING  
INFRASTRUCTURE  
PRODUCTIVITY

ADVANCED  
INFRASTRUCTURE FOR  
PUBLIC, GOODS, AND  
SERVICES

ENHANCING BUSINESS,  
EMPOWERING NATION

By focusing on improving infrastructure, every corner across the nation will be reachable and enabled with advanced facilities, leading to better commuting, faster distribution for product and services, reduces transportation and logistics cost, enhance business and public. In line with the government's effort, PT. Debindo-ITE is proud to support program by organizing

a comprehensive platform which showcases the latest advancement of infrastructure and construction industry through Indonesia Construction Technology Expo (INDOCONSTECH) 2019, the trade show for national infrastructure development, aimed to gather all key players for cooperating together in actualizing "Accelerating Infrastructure Productivity"

## Programmes :

- Developing integrated public and freight transportation systems
- Increasing roads capacity, allocating highway facilities and empowering maritime connectivity across the country
- Improving national economic equality by developing hundred projects of transportation and infrastructure

## Objectives :

- Reducing transportation and logistic expenses
- Exchange of goods and services in effective and efficient manner
- Domestic products will be widely available throughout the countries and become more competitive.
- Opens up new opportunities in other region of Indonesia
- Encourage Foreign Direct Investment within The Nation

# Exhibition Coverage

Within 5 exhibition days, Indoconstech is designed to showcase the infrastructure development roadmap across the nation. The national infrastructure projects are comprehensively presented, starting from planning, applied technology, construction services and its positive impacts will be a subject of exposure to all visitors. The main objective is to create intensive public awareness and further understanding of on-going and finished infrastructure projects.

## TRAFFIC OPERATION & MANAGEMENT

- Barrier
- Gate & Parking
- Information Board
- Lighting & LED
- Marking
- Signs
- Traffic Management System

## CONSTRUCTION MATERIAL

- Asphalt Chip
- Asphalt Spreader
- Batching & Mixing Plant
- Concrete Material
- Formwork
- Pre-cast & Pre-Fabricated Concrete
- Pump & Mixer
- Steel Structures
- Rail & Gauge
- Plugging & Grout

## GOVERNMENT & INSTITUTION

- Government Ministries
- Construction Organizations
- Transportation Authorities

- Boom Lift
- Breaker
- Bulldozer
- Compactor
- Construction Vessel
- Crane
- Crawler
- Dredger
- Excavator
- Floor Saw
- Girder Launching Machine
- Inspection Vehicle
- Roller
- Scraper
- Tractor
- Trencher
- Tunneling Equipment

## CONSTRUCTION EQUIPMENT

- Power Generator
- Power Tools
- Rail & Gauge
- Safety at Work
- Scaffolding
- Site Installation

## CONSTRUCTION SITE & SAFETY

## Exhibitor Benefit

In the era of massive development and transformation in Infrastructure, the aspect of quality and efficiency become the top priority in its dynamics.

Indoconstech Expo delivers to promote the corporate and product advancements with the following benefits:

- Demonstrate and showcase the latest infrastructure development and applied technology to all visitors.
- Direct Interaction with trade visitors and professional for promising opportunities and business deals.
- Expand the business network with prospective agent and partners while having detailed market monitoring
- Increase business and brand exposure by product presentation and sponsorship packages.

# The Business Programme

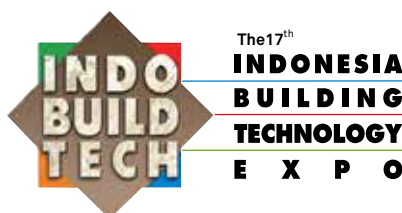

## IndoConsTech Agenda 2019

- In addition to the latest technology and services showcases, Indoconstech establishes a networking and discussion platform to address finest and practical solutions for every challenge in infrastructure development and more, enabling workshop or professional courses to develop the human resource of construction industry for accelerating infrastructure advancement In Indonesia, presented by the exhibitors, guest experts, professionals, authorities, and industry association.
- **National Infrastructure Development Outlook** is designed to present upcoming Indonesia construction projects, and to deal with the issue and limitations of recent projects, starting from financing and investment, land clearing, also the latest applicable technology, material, and equipment the construction industry has to offer.
- **Exhibitor Product Presentation**
- **The Business Programme**
  - Indonesia Institute of Engineers
  - Professional Development Program in Engineering, Construction and Procurement
  - Tender Indonesia 2019 Infrastructure Outlook
  - Precast and Prestressed Concrete Technical Coursework by Indonesia Association of Precast and Prestressed Concrete Companies (AP3I)

## Co-Located Event 2019
